FaxBack

Full Cloud Fax Service

FAXcentric

Go all in with a comprehensive cloud fax service where deployments and migrations are quick and easy.

FAXcentric is an all-inclusive cloud fax service for end users, businesses and resellers offering complete fax client support including email integration and web browsers. What sets it apart from other online or cloud-based fax services is the direct integration of fax machines with HTTPS Fax ATAs.

Service providers can use its powerful, yet easy, cloud fax platform to offer their customer base the same broad feature set without the hassles and headaches of infrastructure management.

THE FEATURES

- Quick and easy deployment with nothing to install or maintain
- Included cloud telephony is optimized for fax
- Full suite of fax clients, including email, web browser, and fax machine along with APIs for other integrations
- Print-to-Fax with web browser client and email notifications
- Web portal for reporting and account management
- Complete HIPAA compliance with umbrella coverage to healthcare customers
- Secure and reliable HTTPS Fax Connections
- EMR/EHR integration available
- Service document conversion (PDF and Office documents)
- Easy migrations from premise-based fax servers
- White label branding (coversheets, notifications, client and management URLs and email domains)
- AudioCodes and ReadyNet hardware devices give non-black box industry known reliability
- Fax ATAs with 1 or 2 lines, optional WiFi and bridge mode

THE HIGHLIGHTS

- Complete Platform for Providers
- Quick and Easy Deployments
- Fax Machines Connected by HTTPS
- Reliable Telephony
- White Label Branding

Service available in USA and Canada

FAST. EASY. ALL HERE.

Deploying or migrating to a new fax solution is fast and easy with FAXcentric. Adding and managing accounts is seamless with browser-based management tools. All possible fax clients (email, web browser, fax machine, Microsoft Fax, and EMR/EHR medical system integration) deploy with ease. For service providers, FAXcentric has powerful management and reporting tools.

FAX MACHINE AT THE CORE

As paper and the need to scan and print documents is still a core need of businesses and healthcare communications, FAXcentric's core cloud service was built around making connections with fax machines reliable. We didn't just stop there, we integrated it into the users' accounts giving them additional features like email notifications for sent faxes. The HTTPS Fax ATA that connects the fax machine is easy to deploy, from a single user to a service provider's full customer base.

RELIABILITY AT BOTH ENDS

When it comes to fax reliability, there are always two halves. Your customers' Internet connections vary greatly and can affect fax communications over standard VoIP based ATAs. Additionally, all too often, telephony routes leave out fax as a priority and typically focus on low-cost routes and mass voice traffic. FAXcentric's fax-only focus on telephony routes and use of HTTPS Fax ATAs to connect fax machines gives users unparalleled fax quality for their fax machine.
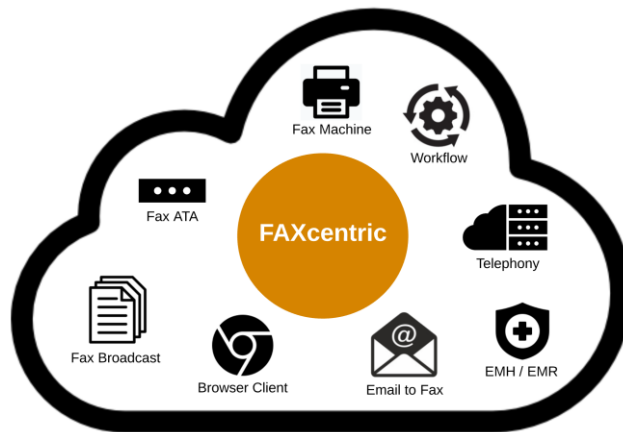

COMPLETE COMPLIANCE WITH UMBRELLA COVERAGE

No need to worry. You are fully covered across all FAXcentric Cloud services with HIPAA and PCI DSS compliance. Healthcare customers have their core HIPAA compliance and security requirements met with FAXcentric's coverage umbrella. HIPAA Business Associate Agreements (BAA) are available upon request.

Deploy a Full-Featured Reliable and Secure Fax Service in Minutes

Let the fax industry experts provide a fax service tailored to your needs. Select your preferred faxing clients and we'll show you how to integrate FAXcentric fast and easy. This fully comprehensive cloud fax service is designed and built to make document delivery easy, giving your users and customers the best faxing experience possible.
