NET SatisFAXtion

VoIP Fax –Small Business Bundle

VoIP Fax Server Software

Cost Effective, Easy to Use, Complete - A fax server solution that leverages the advantages of IP technology into any network environment. Fully enables desktop fax using: Microsoft Fax, Outlook/Email and Office applications. Networks Fax Machines and MFPs with the fax server. Lowers costs by eliminating the need for legacy fax cards. Adds flexibility and centralizes all fax communications to cut costs and improve workflow.

Feature	Benefit
VoIP Fax Solution	Cost effective, easy-to-deploy, strong ROI, future proof
Inbound Fax Routing	Automatically routes faxes to an email inbox as a PDF
Desktop fax	Fax from any application via Print to Fax
Print to Fax	Fax documents from email and Office applications.
Fax Clients	Microsoft Fax, Outlook/Email, Office, Applications, Fax Machine, MFP's
Fax Machines	VoIP Hardware allows Fax Machines to be networked to the fax server

Small Business Bundle – This bundle is easy to set up and install because the VoIP gateway connects externally to the network eliminating the need for dedicated fax hardware and PCI modems. VoIP hardware preserves the ability to deliver faxes directly to a user's email inbox via line and DID routing.
